

# Morteza Karimi

Full-Stack Developer | DevOps Engineer

## About Me

I am a **detail-oriented** and **flexible learner** with extensive experience in various fields such as **Web Development**, Deep Learning, Networking, **Linux**, **Windows**, and more. As a **team player**, I enjoy working alongside others to achieve common goals. I am always seeking new experiences and challenges, preferring to take on new and exciting projects rather than routine work. My reputation for **creativity**, **problem-solving**, **hard work**, and teamwork is a testament to my character. I have mastered **Symfony framework** and **Node.js**, which has given me the ability to develop and improve complex projects. For instance, in my previous job, I worked on **Microservice architecture** and introduced modern and automated solutions using **Docker**, **Ansible**, and **Gitlab CI/CD** to increase productivity and efficiency. My passion for learning led me to expand my skill set by mastering **Angular**, which elevated my position in Bugloss Company from a backend developer to a full-stack developer. During my time at Heyzha Company, I designed and developed complicated portals using **Laravel** and **Yii2** frameworks.

## Experience

### Bugloos

Junior DevOps Engineer

2021 - Present

As a Fullstack Developer, I felt the need to research and work in the DevOps field. So, after some time, I started working as a Junior DevOps Engineer with the Bugloos company. I supervised the development and operation of the projects and tried to make some automatic solutions in the project architecture. To reduce the volume of repetitive daily tasks, I used Gitlab CI/CD, which helped the company and project to develop and improve.

### Bugloos

Full-Stack Web developer

2020 - Present

After working as a Backend Developer for 6 months, I felt the need to learn Angular to develop the company's project faster and better. I started to learn Angular and worked on different case studies until I had mastered it. This effort helped me to improve my job position in Bugloos from a Backend Developer to a Fullstack Developer. I shared my knowledge with my teammates and tried to make a better structure for developing the company's project, which resulted in a good impact on the quality of work in each release.

## Interests

## Bugloos

Back-End Web developer

2019 - 2020

I started my work at Bugloos as a Backend Developer, where I worked on various projects with different domains, such as e-commerce and portals. My responsibilities included improving project calculation algorithms, enhancing query response time, and also updating deprecated bundles and extensions. Additionally, I worked on improving the workflow for the projects, which resulted in more efficient releases.

## Heyzha Programming Co

Web Application Developer

2017 - 2019

I had the opportunity to work on numerous projects, which proved to be a turning point in my career. My work initially involved resolving issues on a website using Laravel framework. I also developed other websites utilizing Yii2 framework, resulting in a significant 33% improvement across all Heyzha company projects. This led to a considerable increase in the company's income, and its business continued to experience an upward trend. The experience allowed me to tackle complex challenges in designing intricate portals, which further developed my skill set as a Web Developer. Overall, my time at Heyzha was an invaluable experience that sharpened my expertise in web development and enhanced my problem-solving abilities.

## Khayyam University of Mashhad

Back-End Web developer

2014 - 2016

As a Back-End Web Developer at Khayyam University of Mashhad, I developed a game project called "tik-tak-toe" using node.js platform and socket.io library for IOS app. Additionally, I led a team in developing the university culture center website, leveraging my previous experience in using node.js and PHP together in my bachelor's final project.

## Freelance Experience

Full-Stack Web developer

2012 - Present

- Promac Co.
 

For the first time I used my admin panel in developing this website, so it followed a great impact and it was the satisfaction of employer.
- Rastegary charity website
 

It's one of my freelance works in the early years of my work field of web developing.

I tried to use PHP MVC framework Yii And UI framework Bootstrap in this web project.

- Time management
- Adaptability
- Critical thinking

## Interests

The first ideas of building my custom admin module for the next projects was occurred during developing this project that was very useful for my future projects.

- Variable project  
I've done different kind of student projects that included website design and android application.  
I worked with electron framework, Qt C++ framework, python language and many other techniques in these projects.

## Volunteer Experience

### Artificial Intelligence projects

Programmer

2017 - Present

Because of my intrest in Image Processing field, voluntary I worked on image processing projects.

Also based on my information about deep learning I started working on a project, that is about forecasting financial markets which is currently underway.

### Create RTL template based on Gentellella theme

Front-End & Translate

2014 - Present

Sharing my abilities and information in translating and RTL on open source template was one of my great work experience.

By searching in google I found out a useful template so I worked on it because having good and free template could be useful for web developers.

I got familiar with different tools in this project and got many feedback from many people all around the world that helped me in developing this project.

### Valencia fan club website in Iran

Full-Stack Web developer

2014

I started my first work experience in field of "web developing" with designing 0 to 100 Valencia fan club website. I had a serious plan for developing this website that led to my employer satisfaction. I used Yii framework for this website to create complicated system such as like, comment and ... efficiently.

### Web Development Teacher

Teacher

2014 - 2019

I always like to share my information with others so I like to have some experiences in designing open source projects or teaching my information to others. So I decided to schedule and plan some courses to teach web development lessons to my students.
